EDUCATION

Master of Science in Cybersecurity | Lewis University | GPA: 3.9/4.0

May 2026

B.Tech in Computer Science Engineering, Honors | JNTU Hyderabad

May 2024

TECHNICAL SKILLS

Technical Support & Ticketing: High-volume ticket triage, user-reported issue analysis, remote support, issue replication, screenshots/log review, customer communication, escalation documentation, SOP/knowledge base documentation, work order documentation

Systems & Applications: Microsoft 365, Windows 10/11, device setup, hardware/software troubleshooting, workstation support, browser troubleshooting, PDF/document workflows, platform navigation

Networking & IAM: TCP/IP, DNS, DHCP, LAN/WAN, subnetting, VLANs, firewall rules, VPN/remote access, Wireshark, Active Directory, Entra ID, MFA, account/access troubleshooting

Security & Monitoring: Log review, SIEM concepts, IDS concepts, phishing awareness, endpoint/security alerts, vulnerability assessment fundamentals, Sophos, Webroot, PRTG, Nessus/OpenVAS fundamentals

Tools & Scripting: Jira ticketing home lab, Confluence/KB documentation concepts, Git/GitHub, Python, SQL, PowerShell, Bash fundamentals, TryHackMe, cybersecurity home labs

EXPERIENCE

Selected Participant | Google Search Priority User Program - Google

Apr 2026 - Present

- Selected for Google's Search Priority User Program focused on search quality, user feedback, and product experience insights.
- Provide structured feedback on search experience and usability while strengthening understanding of information retrieval, user behavior, and AI-assisted search workflows.

Graduate Assistant | Lewis University

Jan 2025 - May 2026

- Supported academic and operational systems serving 200+ students each semester, managing records, spreadsheets, reports, forms, event technology, and process documentation.
- Created user documentation, troubleshooting guides, newsletters, and onboarding/reflection resources that improved communication for non-technical users, reduced recurring questions, and supported consistent issue resolution through documented workflows.

IT Intern | Ikigai: The Art of Living

May 2022 - Jul 2022

- Supported website, digital content, and platform updates for an education organization delivering student development, leadership, and future-skills programs.
- Assisted with troubleshooting user-facing website issues, organizing online resources, documenting technical/content updates, and improving access to program information.

IT and Operations Lead – Volunteer | IQRA Arabic Academy

Jan 2024- Dec 2024

- Supported 100+ students and teachers with software, hardware, device, platform, and access troubleshooting while improving day-to-day technology use across academy programs.
- Digitized 50+ learning materials and exams, organized 4+ tech literacy workshops, and recorded 8+ training sessions to improve digital accessibility and confidence for learners.

IT Analyst Intern | eFusion Solutions

Oct 2022 - Jan 2023

- Managed 30+ weekly IT support tickets covering Microsoft 365, Windows systems, application errors, network access, account administration, and remote desktop issues.
- Leveraged Active Directory, PRTG, Sophos, and Webroot to support 15+ client environments through monitoring, workstation setup, escalation documentation, troubleshooting analysis, and process improvements.

PROJECTS

AuditReady AI | Cybersecurity/GRC Readiness + DevOps Reliability Lab

Spring 2026

- Built a NIST CSF 2.0 readiness MVP with rules-based scoring, control-gap identification, remediation reporting, CI/CD validation, deployment health checks, and troubleshooting documentation.

IT & Networking Home Lab | Segmented Infrastructure Lab

Summer 2026

- Designed a segmented infrastructure lab with WAN, employee LAN, server LAN, security LAN, and guest/test LAN zones covering subnetting, pfSense, DNS/DHCP, firewall rules, Active Directory, IDS/SIEM logging, NOC monitoring, and incident response.

SideQuest Cup | Cybersecurity Learning Lab Hub

Summer 2026

- Built and deployed a web-based cybersecurity learning hub using Next.js, TypeScript, GitHub, and Vercel with modules for SOC/NOC triage, network segmentation, uptime monitoring, IAM review, scam awareness, and response decision practice.

CERTIFICATIONS AND CYBER COMPETITIONS

ISC2 Certified in Cybersecurity (CC) Exam Passed – ISC2

Jul 2026

3rd Place, Capture the Flame Cybersecurity Competition - UIC

Apr 2026

National Cyber League - 644th Solo Standard Bracket; 31st Team Experienced Bracket

Apr 2026

Cisco Cybersecurity Defense Analyst - Cisco

May 2026

Google Cybersecurity Certificate — Play It Safe: Manage Security Risks

July 2026
