EDUCATION

Master of Science in Cybersecurity | Lewis University | GPA: 3.9/4.0 **May 2026**
B.Tech in Computer Science Engineering, Honors | JNTU Hyderabad **May 2024**

TECHNICAL SKILLS

Support & Ticketing: Ticket intake, triage, prioritization and closure, incident and service request handling, SLA response and resolution targets, issue replication, log and screenshot review, escalation documentation with reproduction steps, queue monitoring, trend analysis across ticket history, knowledge base and SOP authoring, customer communication

Systems & Applications: Windows 10/11, Windows Server, Linux, Microsoft 365 (Outlook, Teams, SharePoint, OneDrive), Google Workspace, VMware, imaging and deployment, device setup, hardware and software troubleshooting, printers and peripherals, asset lifecycle and inventory records

Networking & IAM: TCP/IP, DNS, DHCP, subnetting, VLANs, LAN/WAN, VPN and remote access, firewall rules and pfSense, network segmentation, Cisco switches, Wireshark, Active Directory, Group Policy, Microsoft Entra ID, MFA, provisioning, permissions, access review and revocation

Security & Monitoring: Alert triage, log review, endpoint protection in Sophos and Webroot, infrastructure monitoring in PRTG, IDS and SIEM logging, patch and vulnerability remediation, least privilege, phishing and account misuse identification, NIST CSF 2.0, incident documentation

Tools & Scripting: Jira, Git and GitHub, PowerShell, Bash, Python, SQL, Next.js and TypeScript, CI/CD validation, REST API inspection, working use of generative AI for log summarization, scripting and documentation drafting

EXPERIENCE

Selected Participant | Google Search Priority User Program **Apr 2026 - Present**

- Selected to provide structured feedback on Google Search experience, usability, relevance, and emerging AI-assisted search features.

Graduate Assistant | Lewis University **Jan 2025 - May 2026**

- Supported programming serving 200+ students each semester, 30+ external partners, and a team of 20+ staff and faculty.
- Set up and troubleshoot event, conference and presentation technology on site, including projectors, displays, audio and video conferencing.
- Coordinated technical inventory sent to partner schools through the Office of Technology, and managed the office inventory for community school events.
- Wrote the troubleshooting guides, user documentation and onboarding resources adopted as the standard reference, and reconciled records across systems that did not integrate.

IT and Operations Lead (Volunteer) | IQRA Arabic Academy **Jan 2023 - Dec 2024**

- Sole technical resource for 100+ students and staff, handling every incident from intake through to resolution with no escalation path: devices, accounts, network, printers and vendors.
- Analyzed support history and found most requests traced to a small set of recurring causes. Built 4 training workshops and 8 recorded sessions targeting them, reducing repeat requests by 80% and time lost to technical problems from 30% to 10%.
- Raised completion of online assessments by 50% by teaching users the assessment workflow end to end, from access through submission confirmation.
- Administered accounts and access across Microsoft and Google platforms, including provisioning, permissions, MFA, periodic access review and revocation on exit.
- Ran patching and endpoint protection compliance across managed devices, and maintained the knowledge base: 50+ records under a naming convention with version control.

IT Analyst Intern | eFusion Solutions, managed services provider **Oct 2022 - Jan 2023**

- Resolved 30+ support tickets weekly across 15+ client environments by phone, email and remote session, working to response and resolution targets.
- Administered Active Directory and Microsoft 365 accounts, groups and permissions across multi-tenant client environments.
- Configured Cisco switches, built network setups, and deployed virtual servers in VMware.
- Monitored client infrastructure and endpoint health in PRTG, Sophos and Webroot, triaging alerts and applying patches.
- Documented every ticket with the issue, actions taken and outcome, and escalated with reproduction steps and exact error text.

PROJECTS

IT & Networking Home Lab | Segmented Infrastructure Lab 2026

- Designed and administer a segmented lab with WAN, employee LAN, server LAN, security LAN and guest zones, covering subnetting, pfSense, DNS and DHCP, firewall rules, Active Directory, VPN, and IDS and SIEM logging. Built to reproduce failure conditions and practise root cause analysis.

AuditReady AI | Cybersecurity and GRC Readiness Tool 2026

- Built a NIST CSF 2.0 readiness application with rules-based scoring, control gap identification, remediation reporting tracked to closure, CI/CD validation and deployment health checks.

Network Traffic Analysis Lab | Wireshark 2026

- Analyzed DNS resolution, TCP connection setup and HTTPS/TLS traffic, deliberately breaking DNS and validating the resulting behaviour.

CERTIFICATIONS AND COMPETITIONS

ISC2 Certified in Cybersecurity (CC) Jul 2026

Cisco Cybersecurity Defense Analyst May 2026

Google Technical Support Fundamentals; Google Cybersecurity Certificate 2026

Microsoft SC-200 Security Operations Analyst (scheduled) Oct 2026

CompTIA A+ (in progress) 2026

3rd Place, Capture the Flame Cybersecurity Competition, UIC Apr 2026

National Cyber League, 31st place Team Experienced Bracket Apr 2026

TEDx Speaker, TEDxLewisUniversity; Speaker, kcpCON and CornCon 2026
